**III INTERNATIONAL CLINICAL VIROLOGY SYMPOSIUM AND ADVANCES IN VACCINES  
NOVEMBER 8-10, 2010. BUENOS AIRES, ARGENTINA PRELIMINARY SCIENTIFIC PROGRAM**

Dear Colleagues,

As the Latin American correspondent from the Pan American Society for Clinical Virology (PASCV, USA), I am pleased to invite you to participate at the "III International Clinical Virology Symposium and Advances in Vaccines" to be held in Buenos Aires, Argentina on November 8 -10, 2010.

This event is a great opportunity to meet colleagues and friends from different countries and to exchange knowledge on the advances in Clinical Virology. We will discuss about the new viruses, the evolution of viral diagnosis, monitoring in immunocompetent and immunocompromised patients, surveillance in transplant patients, emergent infections, treatment advances and exchange opinions on the improvement, characteristics, and indications of new viral vaccines.

The most well-known international specialists have confirmed their participation. In addition, distinguished local professionals are collaborating with the Symposium to achieve the success of this event.

Virologists, infectious diseases physicians, pediatricians, clinicians, gynecologists and biochemists, from different parts of the world will have the opportunity to meet the experts of each specialty and enjoy a commercial exhibition, showing the latest advances in diagnosis, new therapies and new vaccines.

Looking forward to seeing you in Buenos Aires.

Sincerely yours,

**Marcela Echavarría, Ph. D.**  
President "III International Clinical Virology Symposium and Advances in Vaccines"  
Latin American Correspondent, PASCV

<b>Monday November 8th</b>
<b>Registration</b>
Opening Conference: Update on viral and epidemiological aspects of the pandemic influenza A (H1N1).
<b>BREAK</b>
Round Table: Part I: The Latin American experience with novel H1N1. Part II: The initial burnt in U.S. and Mexico.
Conference: Asthma and respiratory viruses: casualty or causality?
<b>LUNCH + SATELLITE SYMPOSIUM</b>
Symposium: Respiratory viruses Part I: Advances in prevention, diagnosis and treatment.
<b>BREAK</b>
Part II: Globalization and impact of new technologies for detection and characterization
<b>Welcome Ceremony</b>
<b>SATELLITE SYMPOSIUM</b>

<b>Tuesday November 9th</b>
<b>Registration</b>
Conference: Viral load testing in transplantation: International standards.
Symposium: Issues in diagnosis, prevention and treatment of viral infections in transplant patients.
<b>BREAK</b>
Conference: Hepatitis A and Rotaviruses: what have we learnt from the last vaccines?
<b>LUNCH + SATELLITE SYMPOSIUM</b>
Symposium: HPV Diagnosis, massive screening, prevention and treatment.
Latest diagnostic tools and new targets for HPV infection.
<b>BREAK</b>
Symposium: HIV New assays and Management of HIV drug resistance.
<b>SATELLITE SYMPOSIUM</b>

<b>Wednesday November 10th</b>
<b>Registration</b>
Symposium: Hepatitis B and C New developments in molecular diagnostic and treatment Quantitative serology.
Symposium: Flaviviruses: Dengue, St Louis Epidemiology and update on vaccines.
<b>BREAK</b>
Symposium: Innovative Technologies for discovery of new pathogens.
<b>LUNCH + SATELLITE SYMPOSIUM</b>
Poster Sessions (walking poster and <i>Ice cream break</i> )
Final Conference. Advances in viral vaccines.
